

ALMOURIAT APP

**Hello, I'll walk you
through how to
utilize the Almouriat
App**

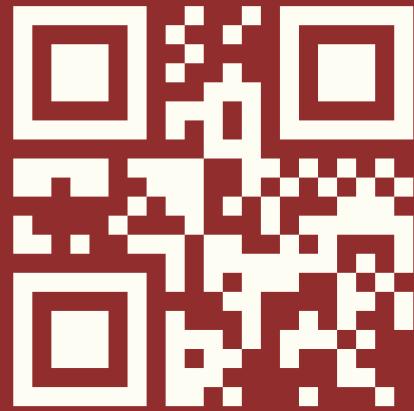

Start

Horse Passport

All stable owners are given a unique barcode to place on their horse's passport so that it can be scanned using our app when registering the horse to race. The barcodes will contain the horse's information

Scan the barcode through Almouriat app

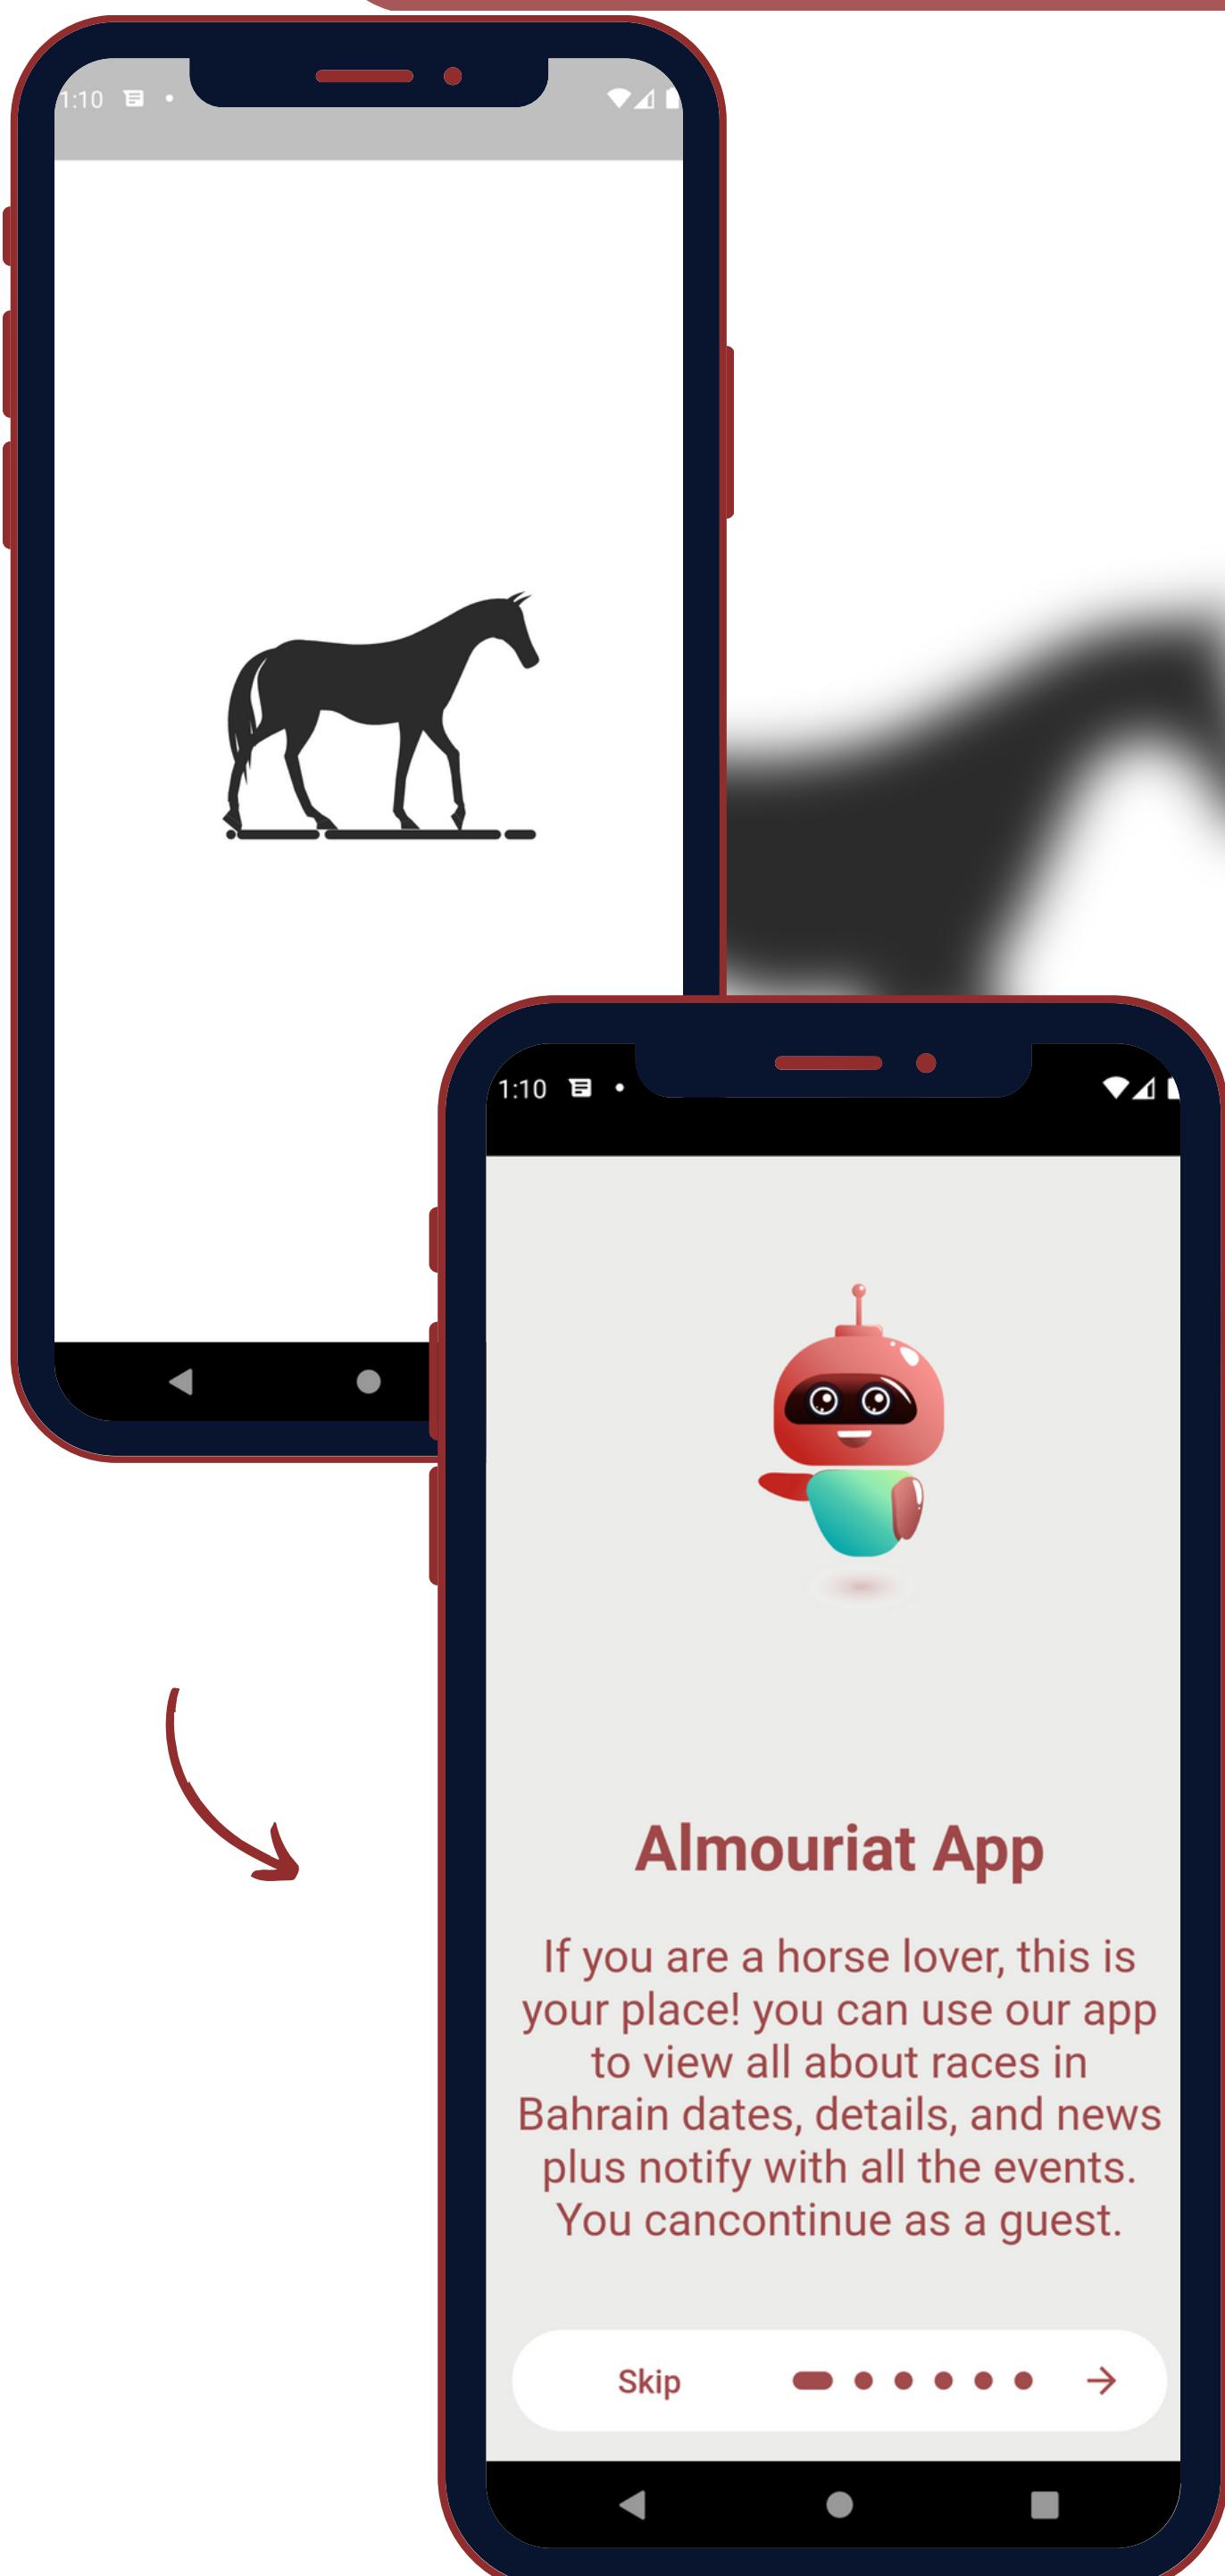

All stable owners will have an account through our app and will be able to log in using their phone number. Once a stable owner logs in, they can register for endurance races by selecting the event, scanning the barcode that contains the horse's information, and filling out the fields for the race stage, and providing a valid Passport number for the rider and trainer. They can also add all of their participants. The Equestrian Federation will then receive all of this information from the stable.

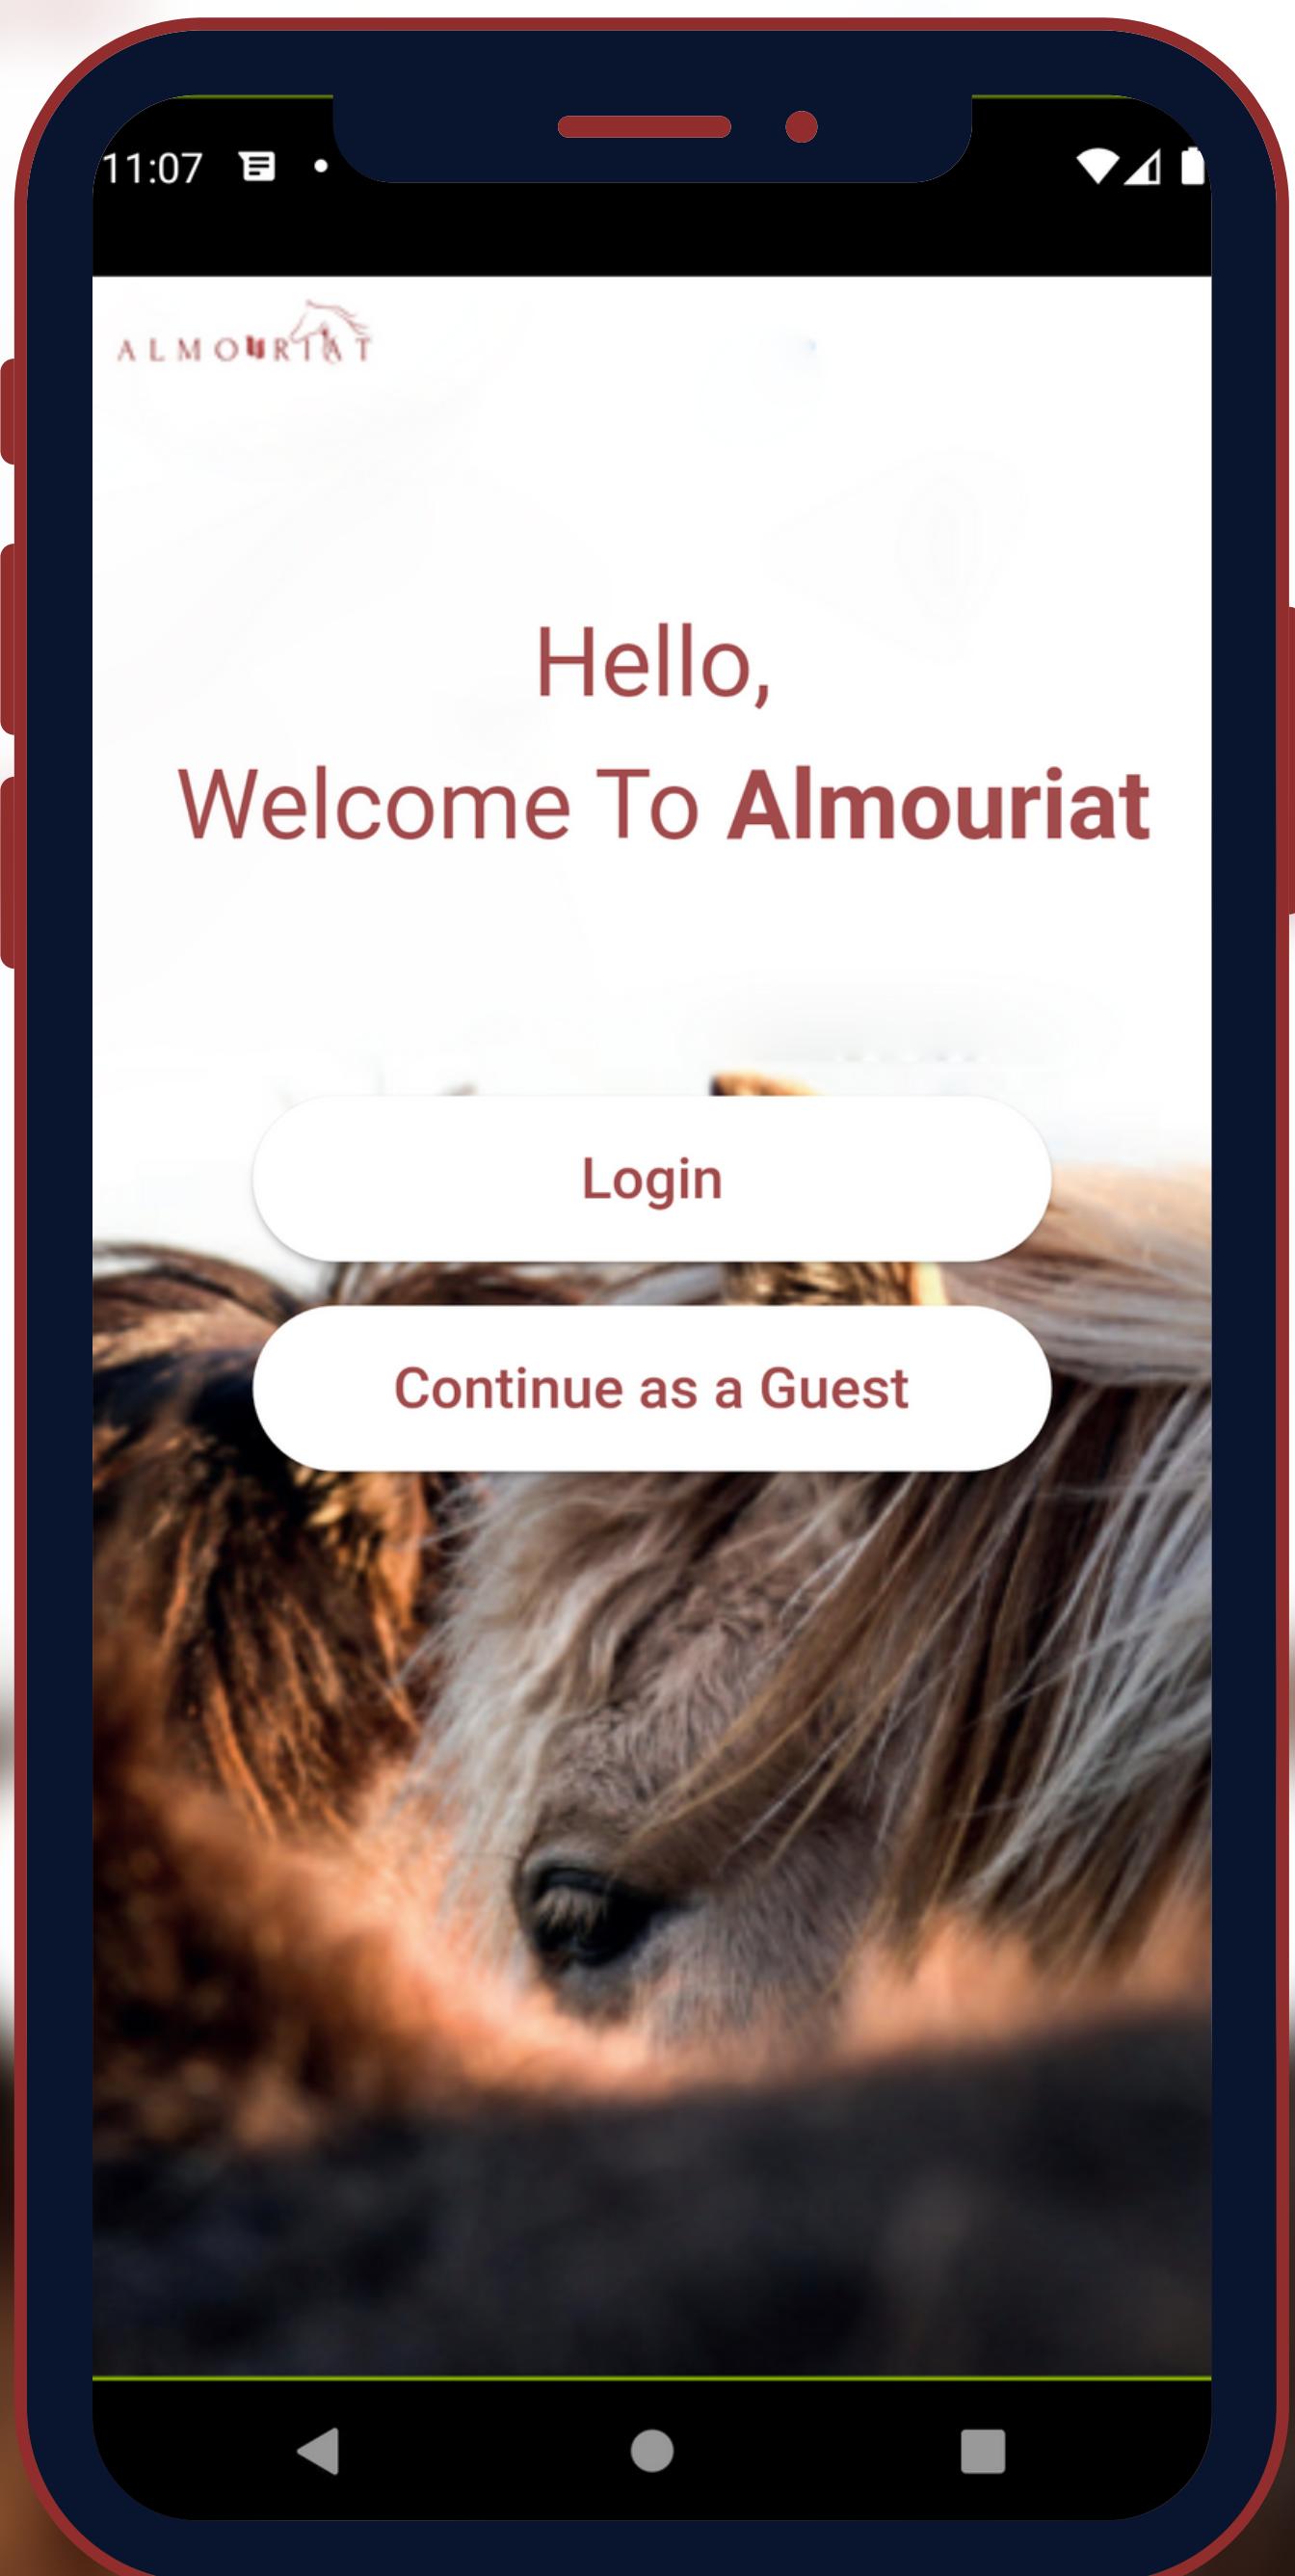

The stable will then be notified if the request has been approved, requires revisions, or needs to be changed. Additionally, the stable will have its own notification system, so if an action from this stable is required, the Equestrian Federation can immediately alert them through the app.

Additionally, the stable has access to their race results and horse reports, which include each horse's heartbeat during each race along with the average rate and their location when they passed the checkpoints. The stable can consult these records whenever they want to confirm that their horse is healthy before the next race.

When a regular user opens the app as a guest, they can see the upcoming race dates and all participant information on the homepage. When stable owners register and are approved, their information will appear on the homepage as participants in the race. Users will also receive notifications for upcoming events, news, or updates. They can also find race results and a list of Bahrain stables.

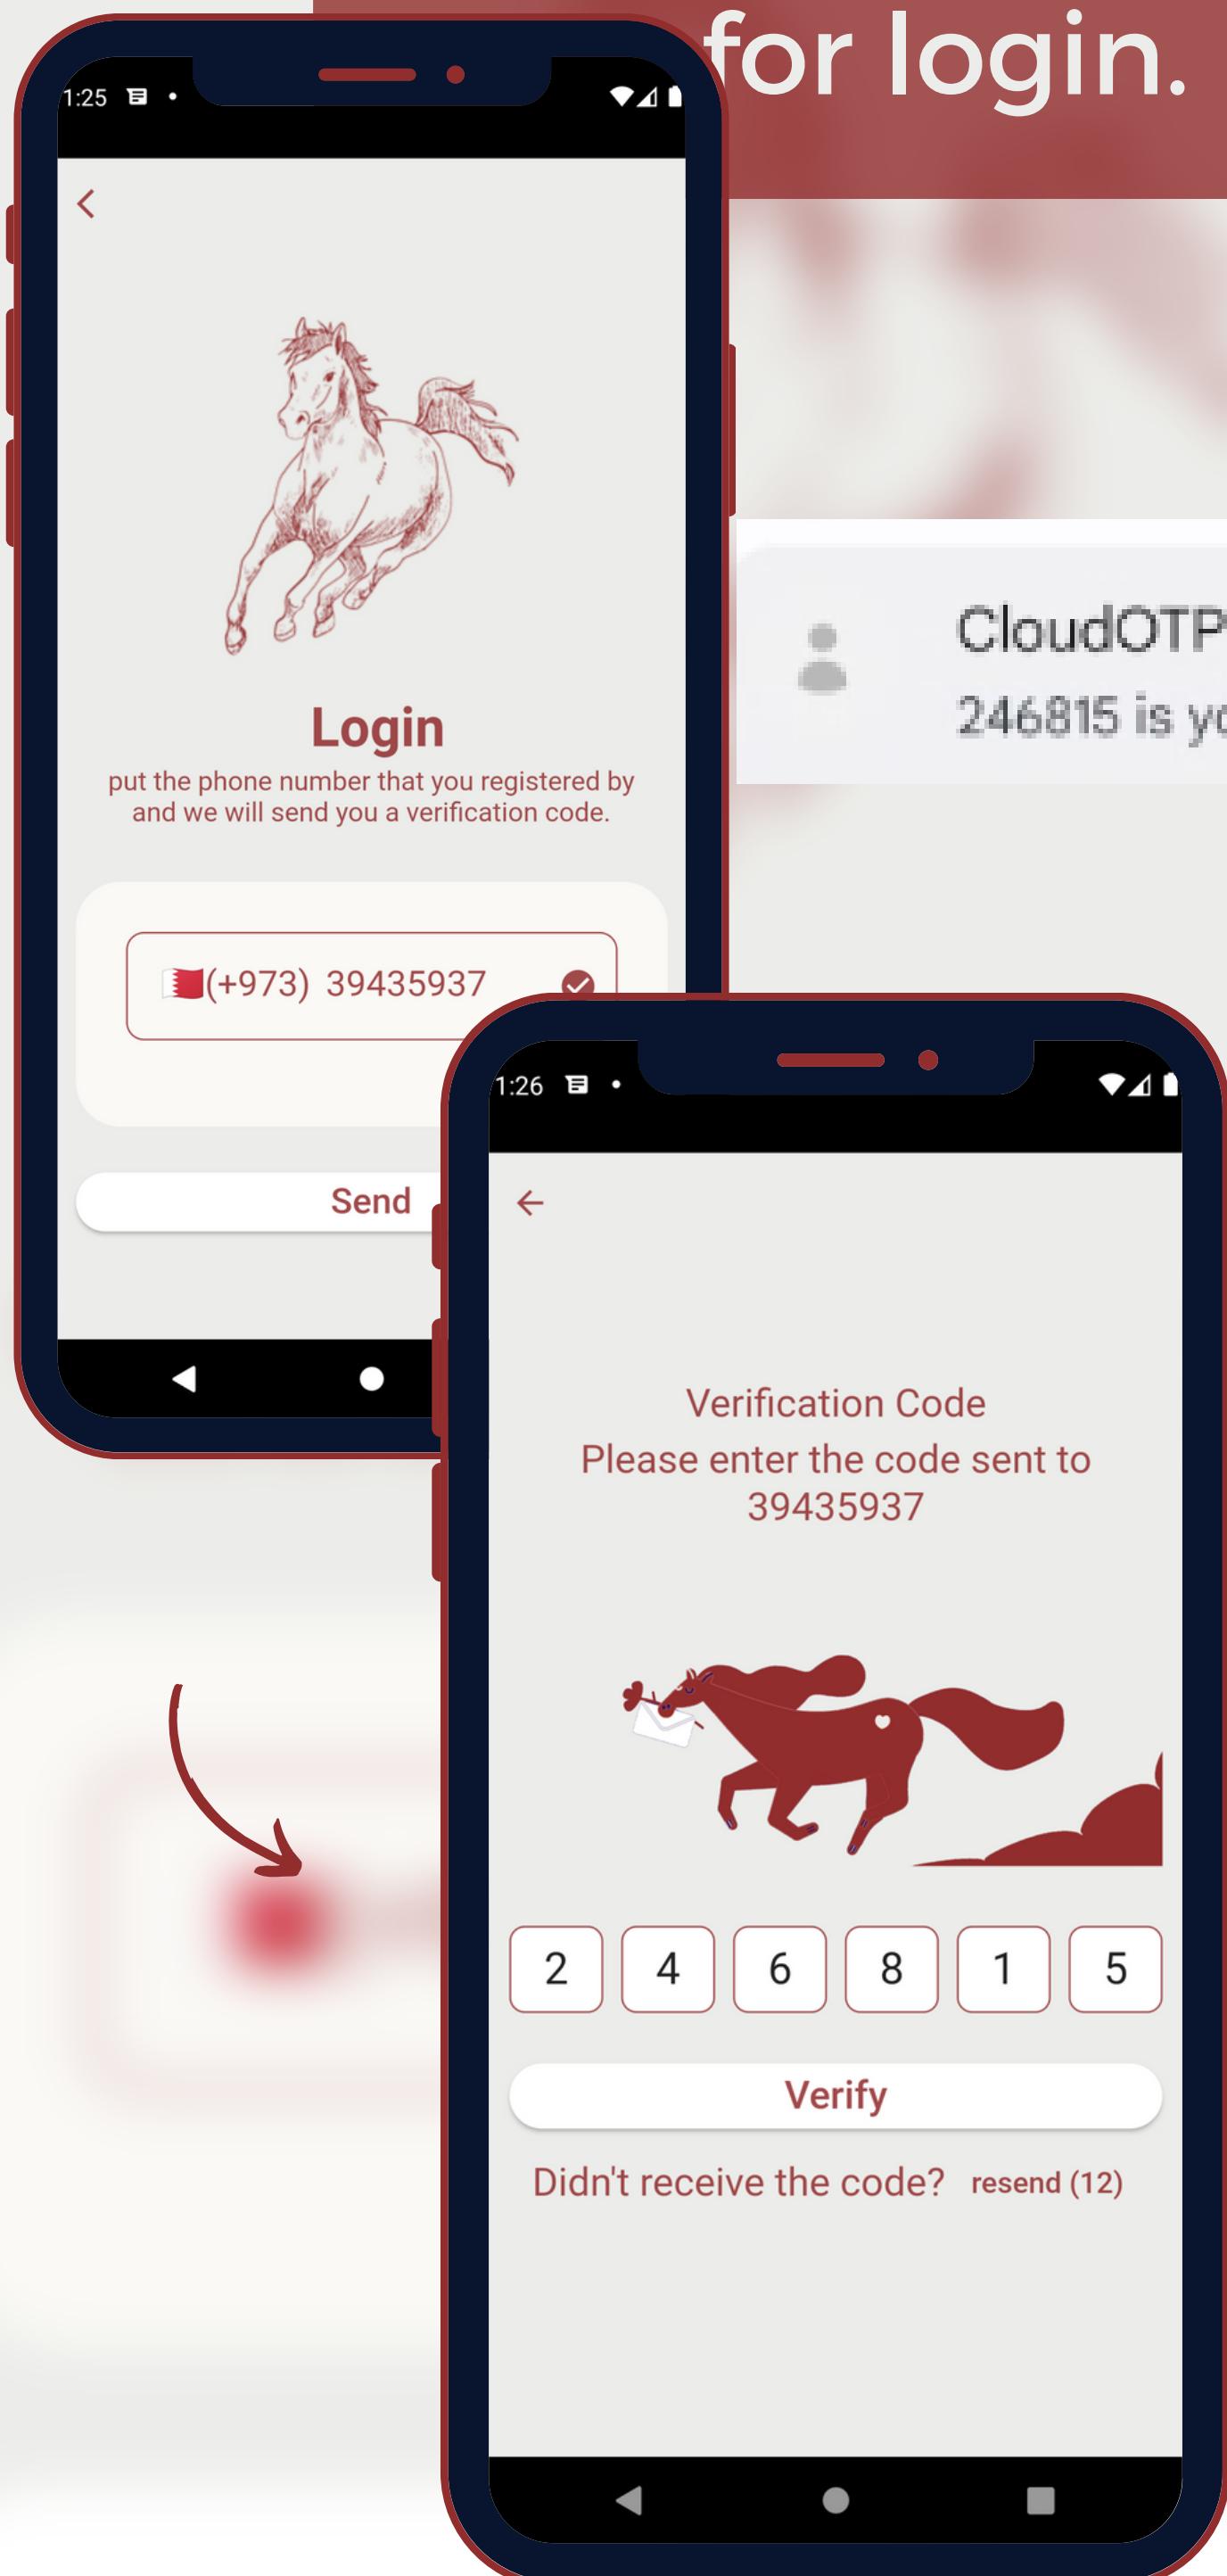

At the beginning you'll find an intro page with a brief guide.

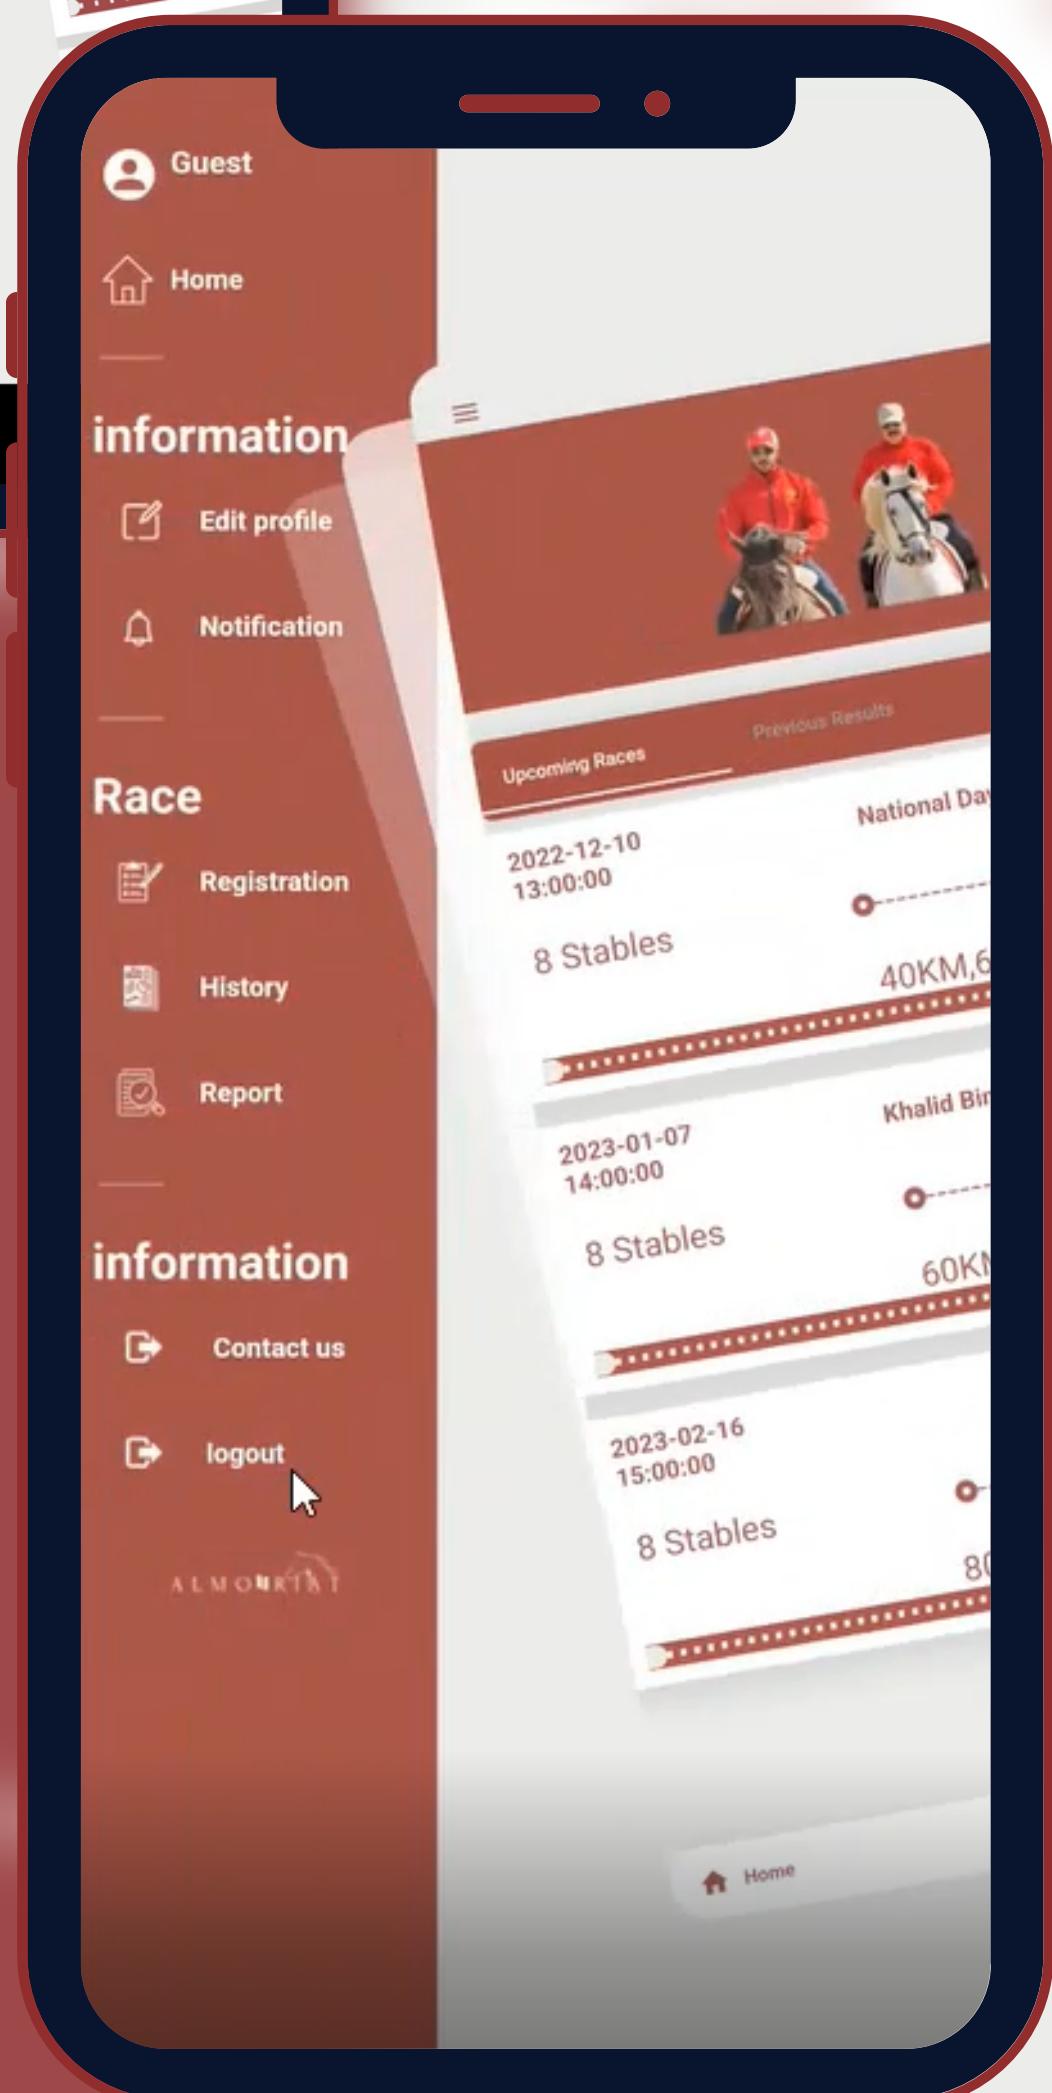

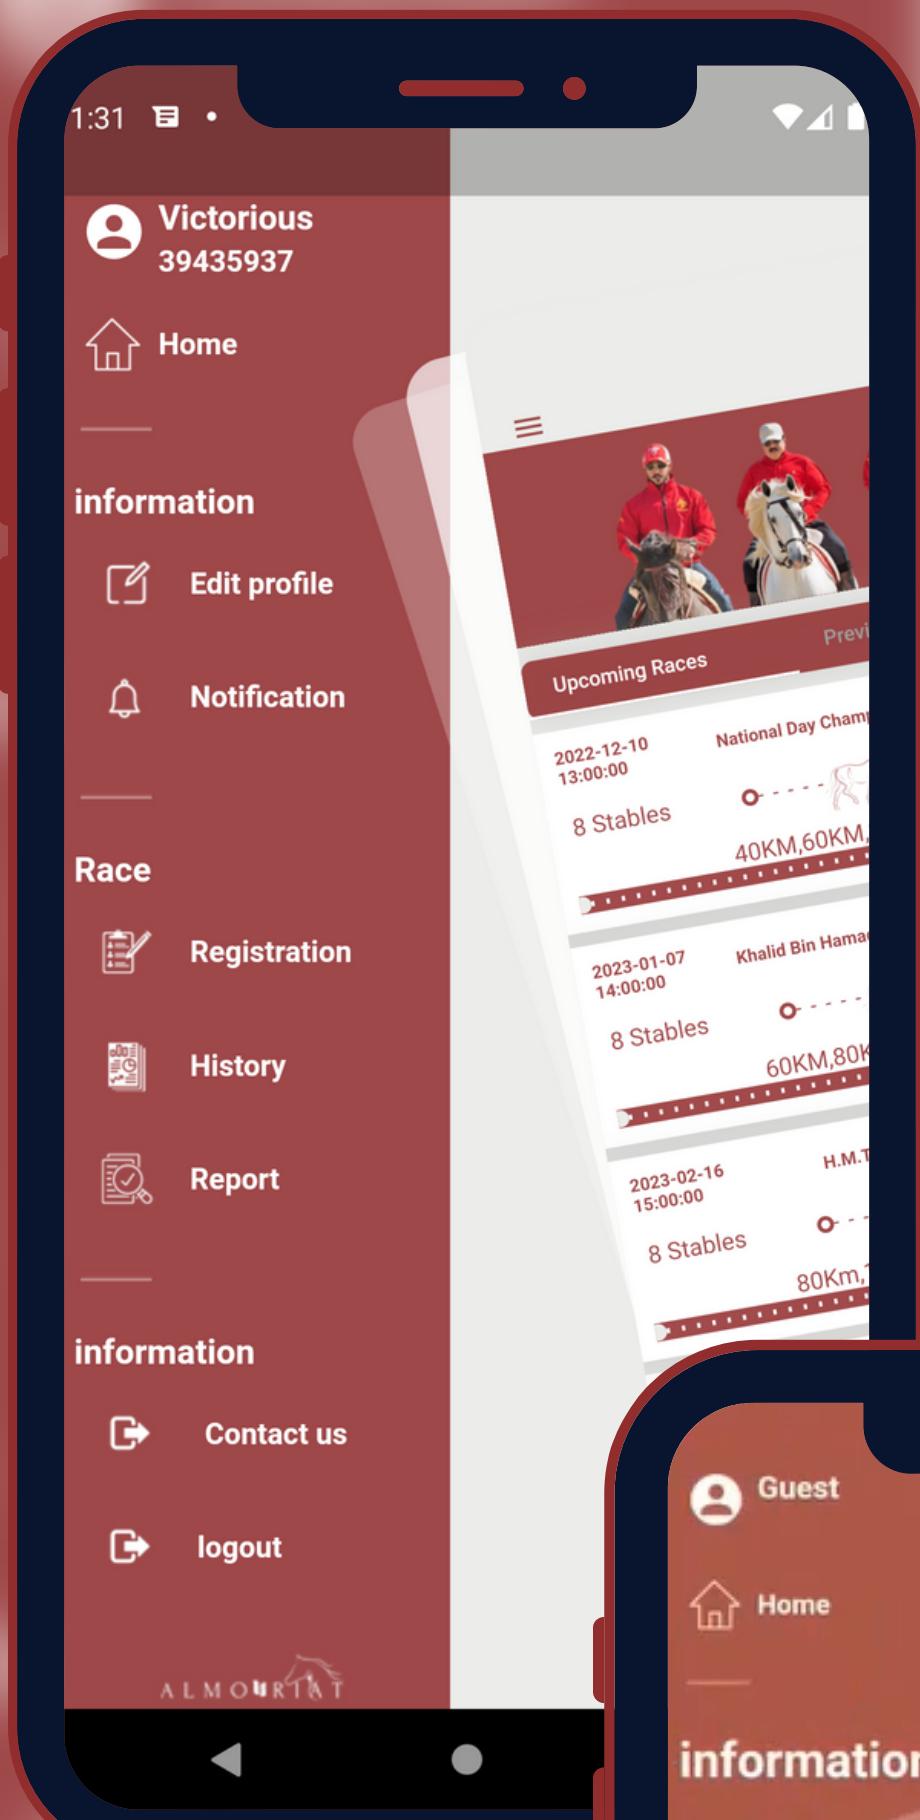

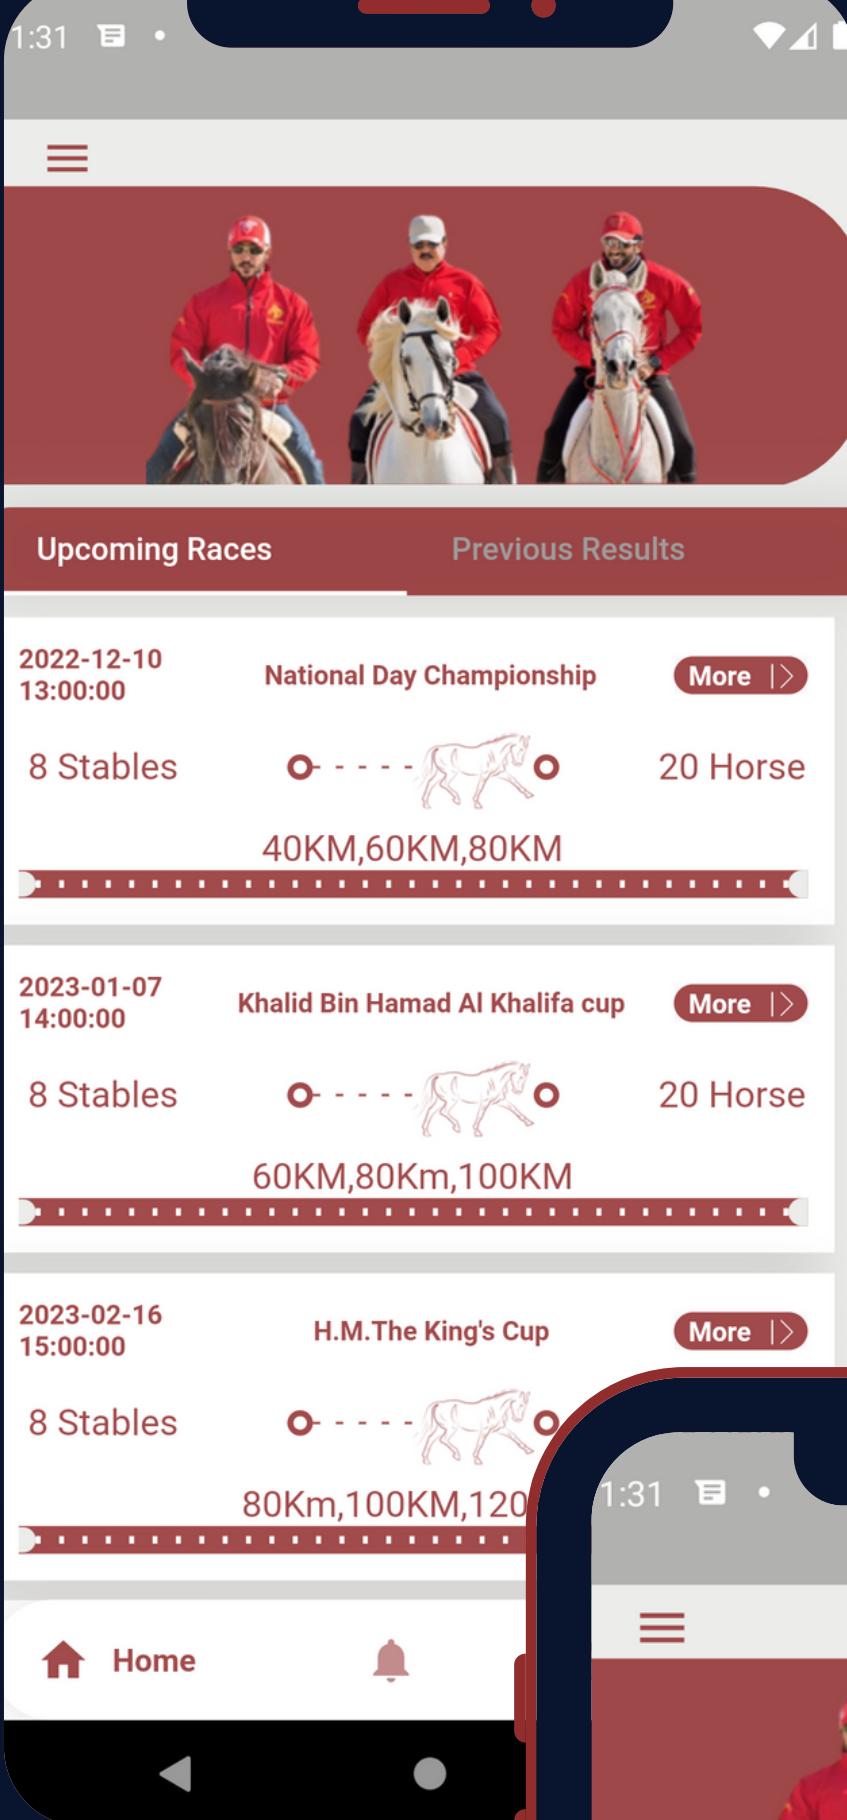

You can log in here if
you are a stable
owner. otherwise, you
can keep exploring as
a guest.

Enter your phone number and you'll receive an OTP code for login.

Here you can see the main home which is share with guest but for user you can find your name and phone on left and the user will see his name as guest.

Home

Here you can find all the upcoming races with details and the results for races
